About us

FreeKids is a collection of 80+ passionate professionals dedicated to providing the best quality playground, fitness, and outdoor equipment, and the friendliest and most dynamic experiences for our customers. We love what we do, and it shows our designs and craftsmanship, which materials we choose, and how we collaborate with our customers to tailor each project to achieve their visions.

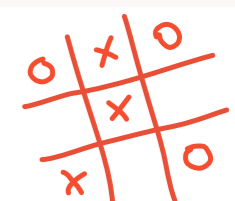

We started in 2007 when Artur Gąsiorek and Zbigniew Andruszewski's passion for fabricating and designing equipment outgrew their existing positions within the industry. They found each other and established FreeKids, starting by creating wooden playground equipment with a focus on durability and quality materials. More materials and designs were added and advanced production techniques were implemented to increase the range of products and customisation. Today 99% of our components are now custom-produced in our 20,000 m² facility located in the picturesque countryside of the Trzebnickie Hills near Wrocław in Poland.

Our passion is collaborating with customers to turn their visions into reality. With over 5,000 successful installations across Europe, Asia, the Middle East, and Latin America, we have a proven track record of bringing dreams to life.

We are proud to announce that we operate in accordance with a quality management system compliant with the international ISO 9001:2015 standard. The certification for our Management System, granted by the renowned TÜV NORD CERT GmbH, guarantees our customers consistent processes, safety, and the highest standards of service.

Information about certification is available at the end of the catalog

Design

Designing interactive public spaces is full of possibilities, fun, and creative challenges and opportunities. Customisation is the fuel that powers our designers who are always happy to work with you to ensure that your project reflects your vision and your community.

Our designers will work directly with you and create a visualisation and technical specifications in whichever format you prefer. We work with innovative software to deliver you high quality 3D visualisations. And with thousands of projects under our belt, we are always happy to share our experiences and expertise.

As we produce 99% of our components, it means we can adapt each piece to fit your design and the environment where it's going to be installed. It's pretty exciting! Customisations you can make include:

UV print any designs onto HPL and solid polycarbonate

Changing the colour of panels and components

Mixing up the theme

Adjusting the height of different sections

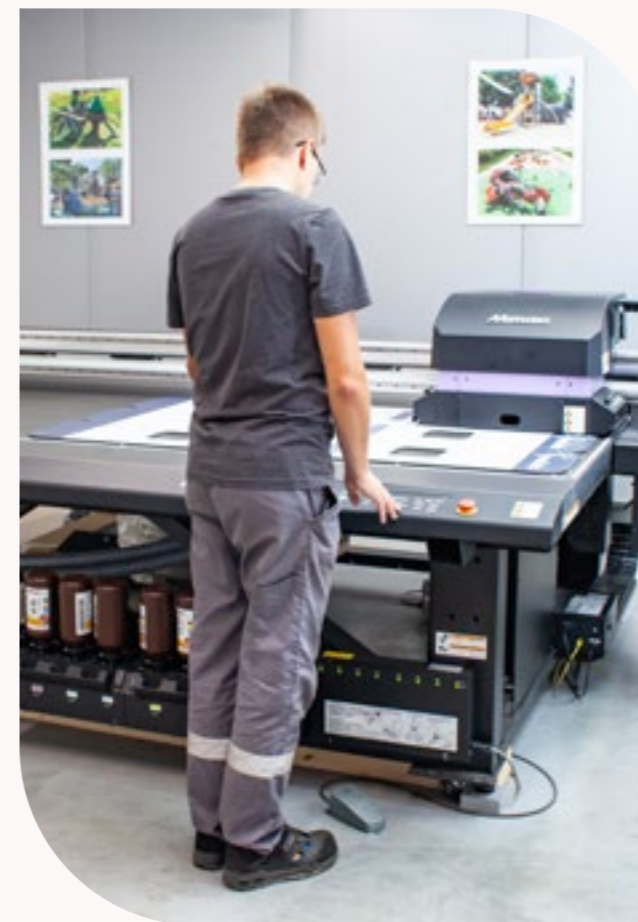

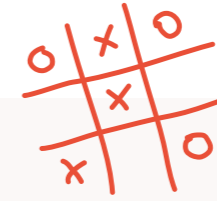

Choosing your preferred material

Production process

Our six production halls totalling over 20,000m² are in the Polish countryside in Zawonia, outside Wrocław. That's where we make 99% of the components for our playground equipment, sports and fitness equipment, benches, and other outdoor installations.

As creative, curious people, we aim to stay ahead of the pack and are always pursuing more advanced technologies and techniques to provide more options to our customers and use fewer and greener resources.

You will find our carpenters, engineers, and designers working side by side to produce our hallmark durable, quality, and gorgeous equipment for your project that will delight your community members. Every member of our time takes pride in what they do and the products they help to create.

You are welcome to come and do a tour to see the craftsmanship and care that goes into each of our installations. You will meet the team and see first-hand how our equipment and processes meet the stringent European Standard EN1176 for playground equipment production and installation.

Materials and components

We take exceptional care in choosing the highest quality materials to produce equipment that is durable, safe, and compliant with applicable standards. We have long-term relationships with trusted manufacturers that offer certification and guarantees. All the materials we source are attractive and functional, and we can customise them to realise designers' creative objectives.

Wood

We choose the highest quality wood to ensure the durability and stability of our equipment. Knot-free and straight grain timber is processed through a multi-stage process that includes thorough sanding for a smooth finish and impregnation and varnishing for excellent wear protection. Designed to last, hot-dip galvanized steel anchors secure from below by preventing direct contact with the ground, and weather-resistant plastic covers shield the wood from above. These measures are taken to prevent rot and moisture damage and extend the lifespan of the equipment.

Robinia wood

Sourced from European FSC®-certified forests and other controlled sources, Robinia is the perfect material for outdoor equipment. It is extremely durable and resistant to load and bending, so it can withstand dynamic loads. Its properties include its exceptional hardness and resistance to moisture when exposed to wet weather conditions and even when in contact with soil.

PP Tunnels

We make tunnels from thick, double-walled polypropylene. It is a strong and resistant material that resists warping, distortion, and acts of vandalism.

Steel components

The strong steel components are available in two durable finish options to meet your needs. The steel structures are galvanized and powder coated with QUALICOAT-certified UV-resistant paints. There is also the option of hot-dip galvanisation and cataphoresis.

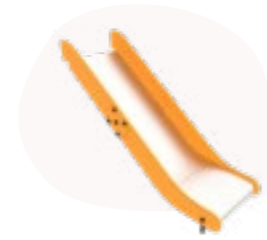

Stainless steel

Boasting a smooth surface and properties that make it completely weather-resistant, we use AISI 304 or AISI 316 stainless steel that ensures a long life span for our metal components including slides and tube slides, as well as fasteners and chains.

Slides

Choose between AISI 304 and AISI 316 stainless steel. Protective side panels can be made from HDPE. All materials are long-lasting with resistance to weather conditions, vandalism, and wear.

Stainless steel tunnel slides

These covered tube slides meet the EN1176 standard and are made of thick AISI 304 or 316 stainless steel. The slide has a diameter of 760mm and a surface sanded to smoothness. You can choose the length of the slide and slide exit which is a half tube, with an open top.

Anti-slip platforms

The platforms are PEFC-certified, with a choice of HPL or plywood that are both waterproof and anti-slip. They are coated with a hot-pressed phenolic film that is imprinted with a honeycomb surface that increases its resistance to damage from chemicals, abrasion, and mechanical damage.

HPL

High Pressure Laminate has unique performance properties, including chemical, fire, wear, and weather resistance. It is one of the most durable decorative surface materials and is used in platforms, panels, and other components.

Recycled HDPE

We use this UV-stabilised polyethylene for our roofs and side panels. It is safe, durable, and highly resistant to weather conditions.

Chains

All chains are made from AISI 304 and AISI 316 stainless steel.

UV Printing

We perform UV printing on polycarbonate and HPL. This is a 2.5D multi-colour printing technology, which makes it possible to create durable and UV-resistant coatings. We can use any image within the CMYK palette as a graphic.

Climbing stones

The climbing walls have stones to grip onto that are colourful and made of hard-wearing resin with mineral fillers that is resistant to damage and solar UV radiation.

Ropes

All the ropes we make used galvanised steel that is covered with PP or nylon. They are linked via connectors made from plastic or metal that is treated to be protected from solar UV radiation, damage, and deterioration.

Protective cups

These plugs cap the exposed tips of the equipment. They protect against wear from weather that could damage the equipment and cause injuries to children.

Anchors

To secure your equipment, we use hot-dipped galvanised steel anchors. The anchors level and stabilise the equipment, as well as extend its lifespan. We offer 4 types of anchors for securing equipment, depending on the type of equipment and your needs.

Bolts

Our high quality bolts are made from galvanised or non-galvanised stainless steel. They are protected by polyamide caps to shield them against weather, general wear and tear, and other external factors.

Max

Max

Characteristic:

Is there a greater feeling than being on top of the world? Maybe when the achievement of climbing to the top is quickly replaced with the pure joy of slippery sliding back to the bottom – then climbing up to do it all again. Apply one of our themes to these customisable towers or UV print custom graphics in your choice of layout, colours, heights, accessories, and number of slides. The sky is the limit!

Functionalities:

-  6-12 years age
-  Modular playground
-  High customization capabilities
-  Low fall height

Possible designs:

Nord

Modern

Sweet

Cloud

The building's core serves as a circulation corridor.

Towers up to 10 metres and observation points at the top.

Lattice walls provide shading and ventilation, ensuring comfort during the summer months.

Two out of the four walls of the tower are open to allow observation.

Fully enclosed structure made of prefabricated components.

Unique and fully personalised design that complements modern architecture.

Wallplay

Characteristic:

Big ambitions in a compact space? The Wallplay series is your answer. These installations are inspired by terrariums, aquariums, and greenhouses and are packed with innovative design features and delightful details. Create a vertical labyrinth with platforms, tunnels, traps, slides, and ladders. Walls are transparent so play can be observed from a distance, and the covered design protects kids from inclement weather.

Functionalities:

-  4-12 years age
-  High customization capabilities
-  High customization capabilities

Up to 5 metres high.

Lumi

Characteristic:

Inspired by a futuristic vision of modern urban spaces that combine flowing, natural silhouettes and wood with metal and industrial elements. These organic sci-fi installations are designed to stimulate the imagination. The structures are mounted on springs to create dynamic movement and playful interactions. Solar-powered lights turn on at dusk to extend precious playtime and add a magical touch.

Functionalities:

 3-12 lat
age

Decorative elements made of polycarbonate and HDPE panels.

Lighting powered by photovoltaic panels.

Unique stainless steel structure combined with elements of curved and laminated wood.

Dynamic devices mounted on springs.

Mini City

Characteristic:

Create your cutest dream village where children will spend endless hours role playing together. Mix and match pieces including little homes, an ice cream shop, a deli, a bakery, a petrol station, a fire station, and a chef's kitchen. Add in options for transport and work vehicles including, a boat, a scooter, a plane, a steam roller, dump truck, crane, tram, or surfboard. Add one of our signs or design and print signs of your own. Low to the ground, these installations are perfect for nurseries and playgrounds for preschoolers.

Functionalities:

-  2-6 years
-  Modular playground
-  High customization capabilities

Highly customisable with different homes, businesses, and transport options to choose from.

Designed for small children.

Inclusive wheelchair accessible version available

Panels made of HPL and HDPE.

Delivered fully assembled for a simple and quick installation.

Tetra

Characteristic:

Future bouldering Olympians and other kids who love climbing and grappling will have hours of fun navigating up and around these cool, geometric climbing structures. They will learn coordination and teamwork and find their determination to defy gravity and reach the top! Choose any combination of colours and build up to 3m high with grips and holes in different sizes, shapes, and patterns.

Functionalities:

6-12 years age

High customization capabilities

Climbing walls for children.

Different levels of climbing difficulty.

Up to 3 metres high.

Steel construction with HPL panels.

Numerous customisation options.

Delivered fully assembled for a simple and quick installation.

RainboWay

Characteristic:

This heavenly playground is for kids who love rainbows, unicorns, gumdrops, fluffy clouds, castles in the sky, and bright multicoloured platforms to walk, run, and skip along. Inspired by fairytale worlds with princesses, princes, and wonderful, magical creatures, it is perfect for toddlers and nurseries.

Functionalities:

-  2-6 years age
-  Modular playground
-  High customization capabilities

Designed for small children.

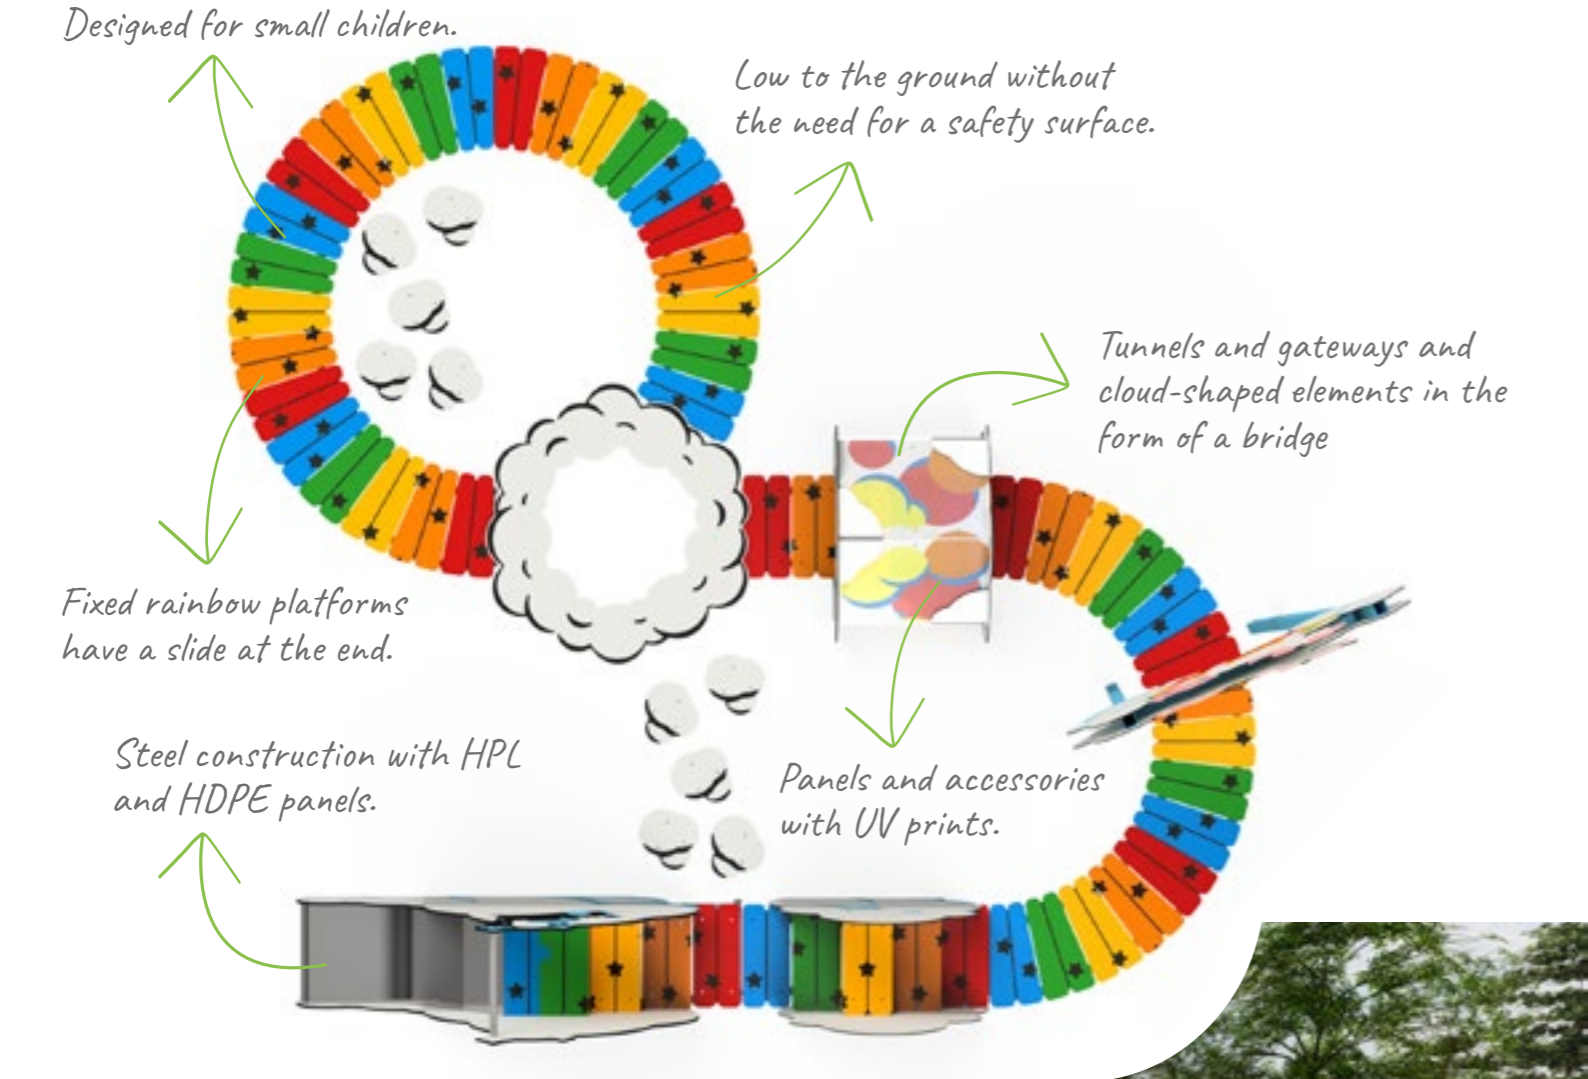

Low to the ground without the need for a safety surface.

Tunnels and gateways and cloud-shaped elements in the form of a bridge

Fixed rainbow platforms have a slide at the end.

Steel construction with HPL and HDPE panels.

Panels and accessories with UV prints.

METAL

Solid, painted metal frames give a fresh, modern look with options for slides, towers, platforms, tunnels, climbing frames, sandboxes, wheelchair accessibility, and more. We had fun designing our extensive range of bright and fun themes that can be classic or modern and are all customisable to fit your design, site, and community. This adaptable construction framework will suit any project.

Product series:

- Free Style 72
- Tree House 92
- Harmony 96
- Hop! Metal 98
- Quicksand 106
- Ahoy 110
- Elipso 112

Free Style

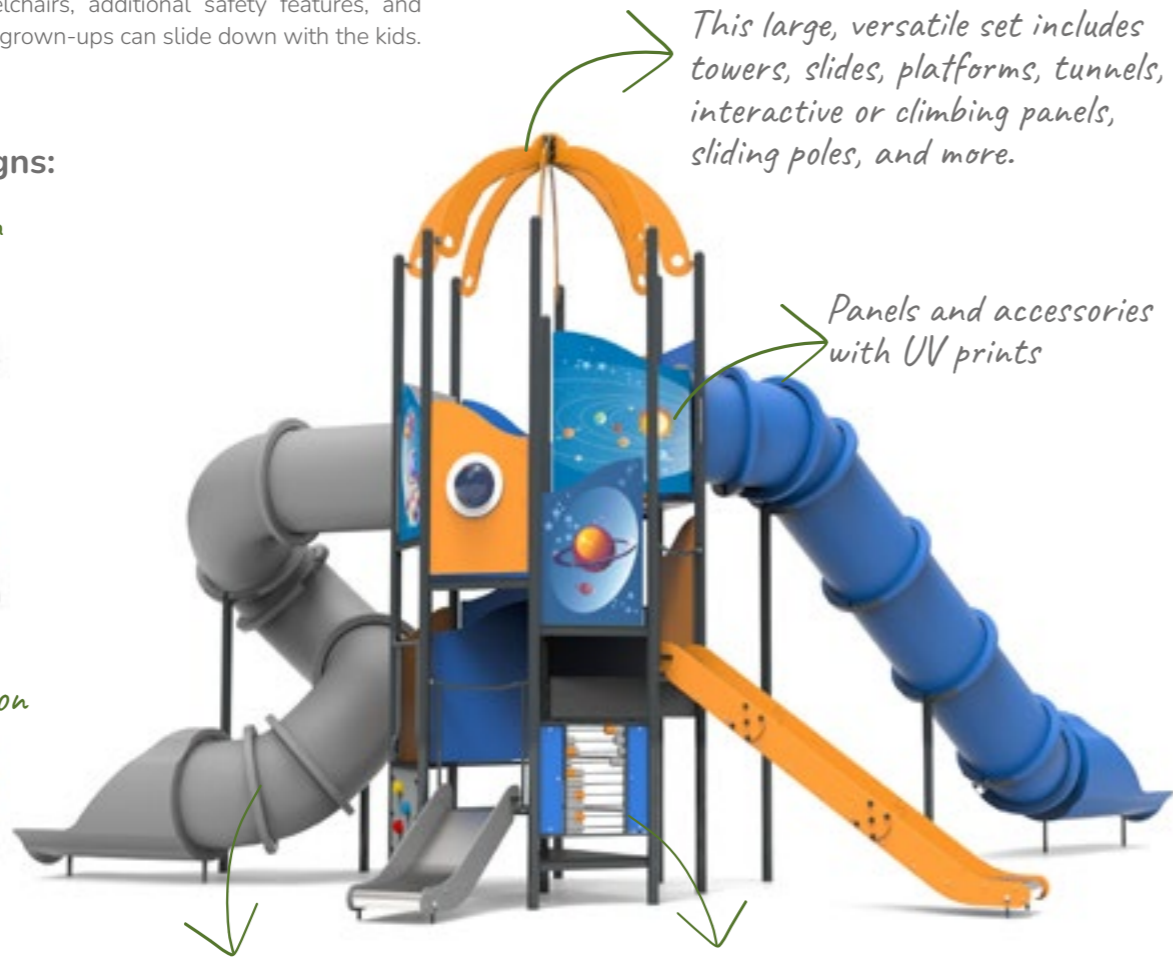

Characteristic:

These striking and long-lasting installations are extensively customisable. Versatility in volumes will whet your creative appetite for these highly durable, long-lasting pieces. Start with one of our themes like Moon, Cool, or Balloon, then let your imagination run free. Add your own personal flair by choosing your own combination of towers, slides, platforms, tunnels, interactive or climbing panels, sliding poles, and more. All ages and abilities are catered to with ramps and raised sandboxes for wheelchairs, additional safety features, and extra-wide slides, so grown-ups can slide down with the kids.

Functionalities:

-  3-12 lat
-  Modular playground
-  High customization capabilities

Possible designs:

This large, versatile set includes towers, slides, platforms, tunnels, interactive or climbing panels, sliding poles, and more.

Panels and accessories with UV prints

Tube slides made of LDPE

Wide range of applications with extensive customization options

Tree House

Characteristic:

Children are free to explore treetops and spark their imaginations in these forest and woodland-themed playgrounds. We were inspired by childhood forts and cubby houses and then added some friendly bears and birds and snails. These installations will have kids of all ages traversing the treetops as they climb and explore your chosen combination of platforms, rope ladders, climbing boards, slides, interactive panels, and buildings.

Functionalities:

3-12 years age

Modular playground

Harmony

Characteristic:

Play is about creation, exploration, and discovery. Harmony playgrounds spark the imagination and give children the opportunity to shape their world. Each project is a dialogue between architecture, nature, and human experience, blending seamlessly into the landscape and encouraging wonder and play.

Functionalities:

3-12 lat age

Modular playground

Balanced development, thoughtful design.

We believe in harmony between nature, architecture, and fun.

No welding - environmentally friendly and easy to service.

The production process ensures eco-friendly playgrounds.

Platforms made of anti-slip HPL.

Hop! Metal

Characteristic:

Hop, climb, swing, hang, balance, pull up! Based on fitness equipment, these pieces challenge and build little muscles as the kids interact with the ropes, bars, ladders, climbing walls, and balance beams. Add a component to your playground or create the coolest obstacle course by combining them all.

Functionalities:

3-12 years age

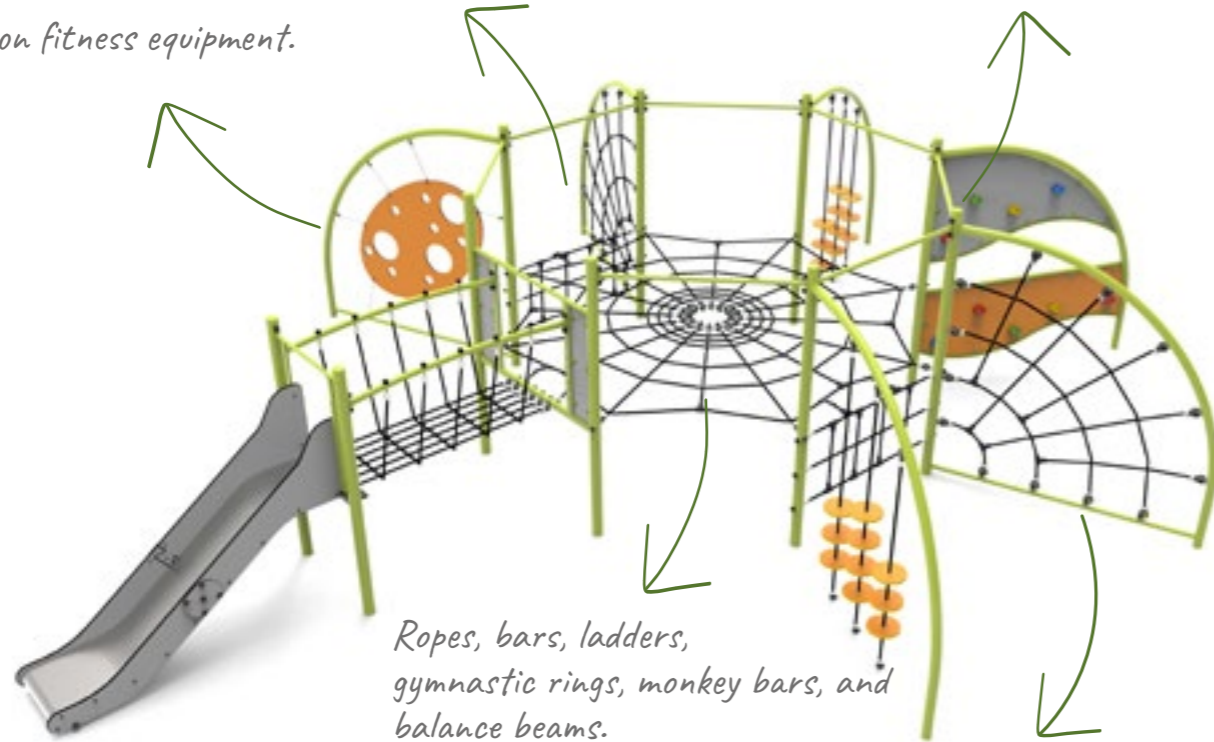

Modular playground

Equipment can be placed to create a fitness course.

Steel construction with ropes and HPL and HDPE panels.

Based on fitness equipment.

Ropes, bars, ladders, gymnastic rings, monkey bars, and balance beams.

Climbing walls can be added to complete the course.

Quicksand

Characteristic:

Sky above, sand below, peace within. Add sensory fun to your playground with these interactive sand sand-based activities. Kids engage with the sand using buckets, sieves, chutes, pulleys, and other moving parts that spark joy and curiosity while developing and stimulating their minds. Raised boxes are wheelchair accessible, so everyone can play together.

Functionalities:

-  2-9 years age
-  Modular playground
-  High customization capabilities
-  Low fall height

Equipment designed for placement on a sandy surface.

Ahoy

Characteristic:

The littlest sailors, captains, Dorys, and Nemos will have fun exploring and interacting with this underwater world. Mix and match interactive panels with educational games designed to challenge their minds and test their coordination. The fun ocean-themed equipment is low to the ground for accessibility, safety, and independent play.

Functionalities:

-  2-9 years age
-  Modular playground
-  High customization capabilities
-  Low fall height

Ahoy 8
Code: 0130001

Designed for small children.

Option for semi-transparent UV-printed panels

Simple raised play equipment with small structures, paths and platforms.

Add educational walls and panels

Nie wymaga bezpiecznej nawierzchni.

Elipso

Characteristic:

Clocks, puzzles, abacuses, games – these tactile, interactive panels feature activities that are fun and accessible for all abilities and ages. They engage even the smallest playmates and their simple designs belie the hours of entertainment they provide. Kids can test coordination with game panels or a climbing wall, compete at noughts and crosses, or just enjoy the simple joy of a slide that's nice and low to the ground for independent navigation. Create a wall of linked panels or choose a few to incorporate into any playground design as stand-alone or in a structure in the place of a wall piece.

Functionalities:

2-5 years age

Modular playground

Low fall height

Designed for small children.

Linked wall of educational, multifunctional, interactive panels.

Panels include clocks, puzzles, abacuses, and games.

Completes the Freestyle series.

Wheelchair accessible.

CLAMPS

Clamps is a modern, modular steel framework that uses strong, sturdy clamps to connect each component. Easy to assemble, it offers designers almost limitless construction potential. Adaptable to any theme, we love the look with mechanical and nature-based creations like gardens or dinosaurs, or you can get creative and UV-print your own designs. Unleash your imagination with this powerfully versatile system.

Product series:

- Industrial 120
- Vibu 124
- Jura 128
- Mini Florini 132

Characteristic:

Tunnels, trains, a production line, and big machinery – the machine age meets the playground in these creative designs where your junior engineers will be immersed in the world of big industry and big fun. We love the look of black or stainless steel combined with the colourful steampunk artwork and the interactive gears, pulleys, chutes, and mechanical components. Spring-mounted pieces add soft, playful motion to this creative and engaging theme.

Functionalities:

4-12 years age

High customization capabilities

Equipped with movable, interactive toy elements such as gears, pulleys, and chutes.

Equipment forms a production line and vehicles.

HPL panels with UV printing.

Range of complementary devices, including urban furniture and single devices.

Constructed from black or polished stainless steel.

Spring-mounted pieces add playful motion.

Characteristic:

The sky is the limit with these endlessly customisable modular structures that harness the Clamps system to the fullest. You dream it, we will make it! Towers can be up to 6m high, and pair perfectly with a giant covered, stainless steel slide. Add to these sleek, shapely modern designs with your own combination of platforms, ladders, rope bridges, climbing panels, or any of our other components or classic sets. Unleash your imagination.

Functionalities:

-  3-12 years age
-  Modular playground
-  High customization capabilities

Stainless steel structure secured with aluminium clamps.

Towers up to 6 metres high.

HPL platforms on Customisable UV printed side panels.

Stainless steel or plastic tunnel slides.

External walls above 3 metres are reinforced with steel profiles.

HPL platforms on welded steel frames.

Jura

Characteristic:

Step into a prehistoric world with a dinosaur-themed playground where kids can climb and conquer Diplodocus, Tyrannosaurus, and Pterodactyls. Immerse them in the Jurassic Age by combining high modern towers for climbing and exploration with twisting, serpentine slides and rope walkways. The stainless steel and wood theme is accentuated with vines and leaves after the lush, tropical Cretaceous period.

Functionalities:

-  3-12 years age
-  Modular playground
-  High customization capabilities

Mini Florini

Characteristic:

Cute, fun, friendly, and playful designs that feel like stepping into a cartoon or children's book. This bright, adaptable series transports our smallest kids into a magical, interactive garden world where they can jump, climb, and slide on platforms and equipment that are safely low to the ground. Shaded by big, colourful flowers that feature a porthole to the sky, components can be UV-printed with your own designs.

Functionalities:

-  2-6 years age
-  Modular playground
-  High customization capabilities

WOOD

These beautiful, sustainable pine, larch, spruce, and robinia wood constructions can be finished with different stains and textures that will suit any design or setting. Providing the lowest carbon footprint, this durable, wooden playground equipment also has options for playful pops of colour, creative modern themes, and accessibility for wheelchair users. Dream these designs into classic playground formations or modern masterpieces, these eco-friendly installations will deliver.

Product series:

- Slavia 138
- Castle 144
- Farm 150
- Hop! Wood 156
- Robin Wood 162

Slavia

Characteristic:

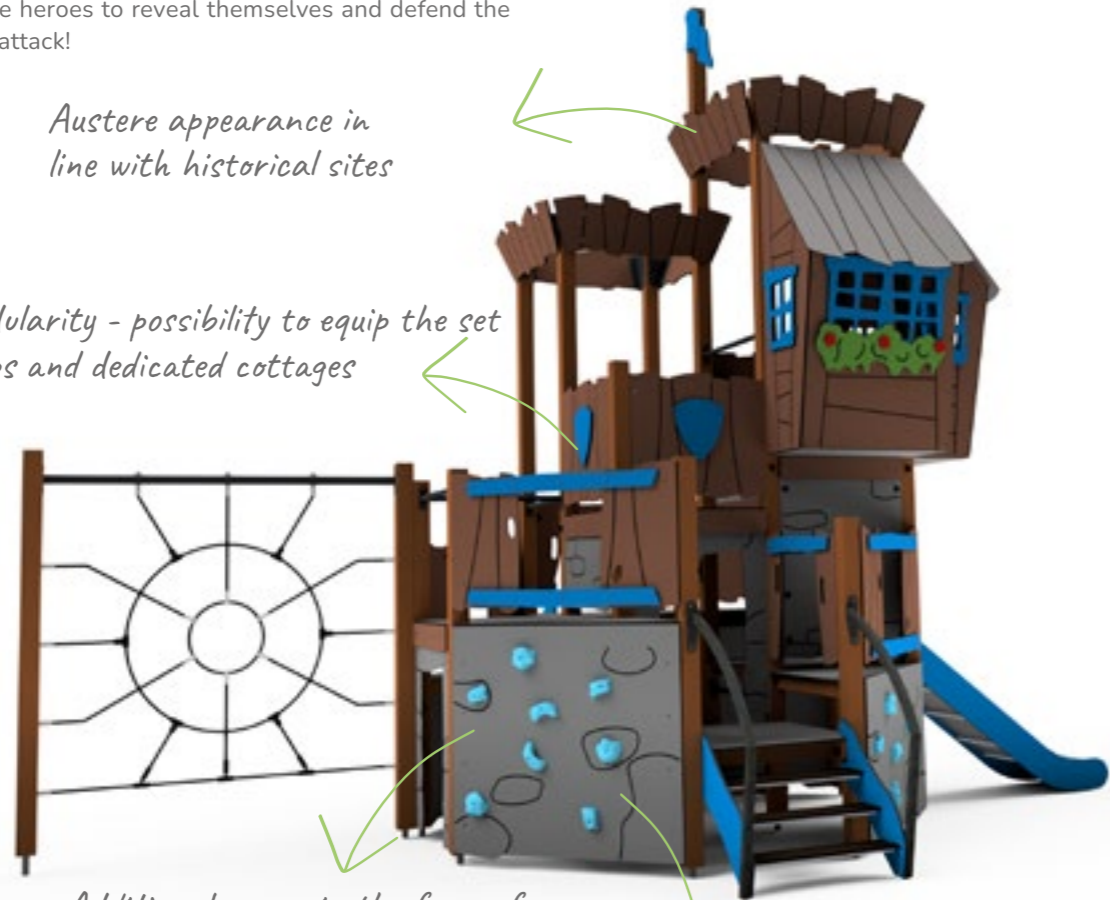

Imagine a bustling medieval port and fishing town where peaceful village life is punctuated by the arrival of visiting ships filled with sailors and ocean-bound adventurers. Kids can ride the spring-mounted dragon that awakens from its slumber to wreak havoc on the villagers and compels true heroes to reveal themselves and defend the castle from attack!

Functionalities:

-  3-12 years age
-  High customization capabilities

Austere appearance in line with historical sites

High modularity - possibility to equip the set with ships and dedicated cottages

Additional rooms in the form of mazes at ground level

Medieval theme - stair plates leading all the way down imitating fortification walls

Castle

Characteristic:

Your childhood fort dreams have come true! These medieval-inspired installations will have kids defending the castle, protecting the treasury, and launching daring attacks on the invading hordes. Crafted from laminated wood, the castle and fort installations also have myriad fun details and decorations to set the medieval mood. Adaptable to all age groups, kids will be inspired to climb, slide, and immerse themselves in their own epic tales.

Functionalities:

-  3-12 years age
-  Modular playground
-  High customization capabilities

Farm

Characteristic:

Barns and hay bales, cows, chickens, eggs, and farm friends are all here in this fun series. Our little farmers and farm-hands will have fun playing together in these installations that are accessible for wheelchair users and low to the ground so they're perfect for nurseries and preschools.

Functionalities:

-  3-12 years age
-  Modular playground
-  High customization capabilities

Raised playground with options for wide platforms, rope bridges, steps, slides, and interactive panels.

Wheelchair accessible.

Customisable with UV printing.

Safety surface not required.

Designed for small children.

Hop! Wood

Characteristic:

Hop, climb, swing, hang, balance, pull up! Based on fitness equipment, these pieces challenge and build little muscles as the kids interact with the ropes, bars, ladders, climbing walls, and balance beams. Add a component to your playground or create the coolest obstacle course by combining them all.

Functionalities:

 3-12 years age
 Modular playground

Ropes, bars, ladders, gymnastic rings, monkey bars, and balance beams.

Sport theme.

Equipment can be placed to create a fitness course.

Climbing walls can be added to complete the course.

Robinia wood construction with HPL and HDPE panels.

Robin Wood

Characteristic:

Sustainable, ecological Robinia wood brings its natural beauty to these installations along with its inherent hardness and durability as a construction material. The classic, traditional designs of our childhood playgrounds fit can now be enhanced with contemporary interactive designs and configurations. These installations fit perfectly in a park or woodland setting or provide a natural look to contrast against an urban cityscape.

Functionalities:

-  3-12 years age
-  Modular playground
-  High customization capabilities

Structural elements made of Robinia wood

Modern and natural design of equipment

Additional elements made of stainless steel

SPORT

Fitness for all! These fun, functional, and interactive community spaces invite people of all ages and abilities to move and work their muscles. Choose from our wide selection of state-of-the-art fitness equipment that ranges from gentle stretching to a full outdoor workout, including strength training machines targeting specific muscles, pull-up bars, parallel bars, and cardio stations.

Serie produktowe:

- Hydrofit 208
- Fitness Standard 212
- Fitness Plus 220
- Mini Fitness 229
- Street Workout 232
- Sport Arenas 238

Characteristic:

Luxurious resistance! The adjustable resistance on this equipment stretches and builds targeted muscles by utilising single-acting or double-acting hydraulic actuators. There are 6 different difficulty settings, so the load can be increased and decreased according to each person's needs. Just like at a professional indoor gym, this equipment is heavy-duty and safely targets specific muscle groups.

Functionalities:

14+ lat age

High customization capabilities

Stainless steel or black galvanised steel frame with HDPE seat and backrest.

Designed for teens, adults, and senior citizens.

Hydraulic actuators so individuals can adjust the resistance.

10 different pieces of equipment.

No risk of entrapment.

6 levels of difficulty that can go up to 100 kg.

Mini Fitness

Characteristic:

Perfect for schools, kindergartens and playgrounds! When we learned how much kids loved exploring and using the outdoor fitness equipment, we made them some of their own. With smaller dimensions and more interactive group and play-style equipment, these pieces are designed to adapt to their growing bodies and skills.

Functionalities:

6-12 lat age

High customization capabilities

Meets the PE-EN 1176 standard for installation in schools, kindergartens, and playgrounds.

Designed for children aged 6-12.

More than 10 different pieces of equipment.

Increases strength and improves coordination and balance.

Made of galvanised and powder-coated steel with HDPE fixtures.

Street Workout

Characteristic:

Old school resistance training. With no moving parts, this equipment is the framework for using the body's own strength and weight to build muscle and improve strength, flexibility, and fitness. We think it's the hardest workout. Think sit-ups, squats, pull-ups, chin-ups, and knee raises. Increasing in popularity, it creates a great place for people to meet and challenge themselves and each other.

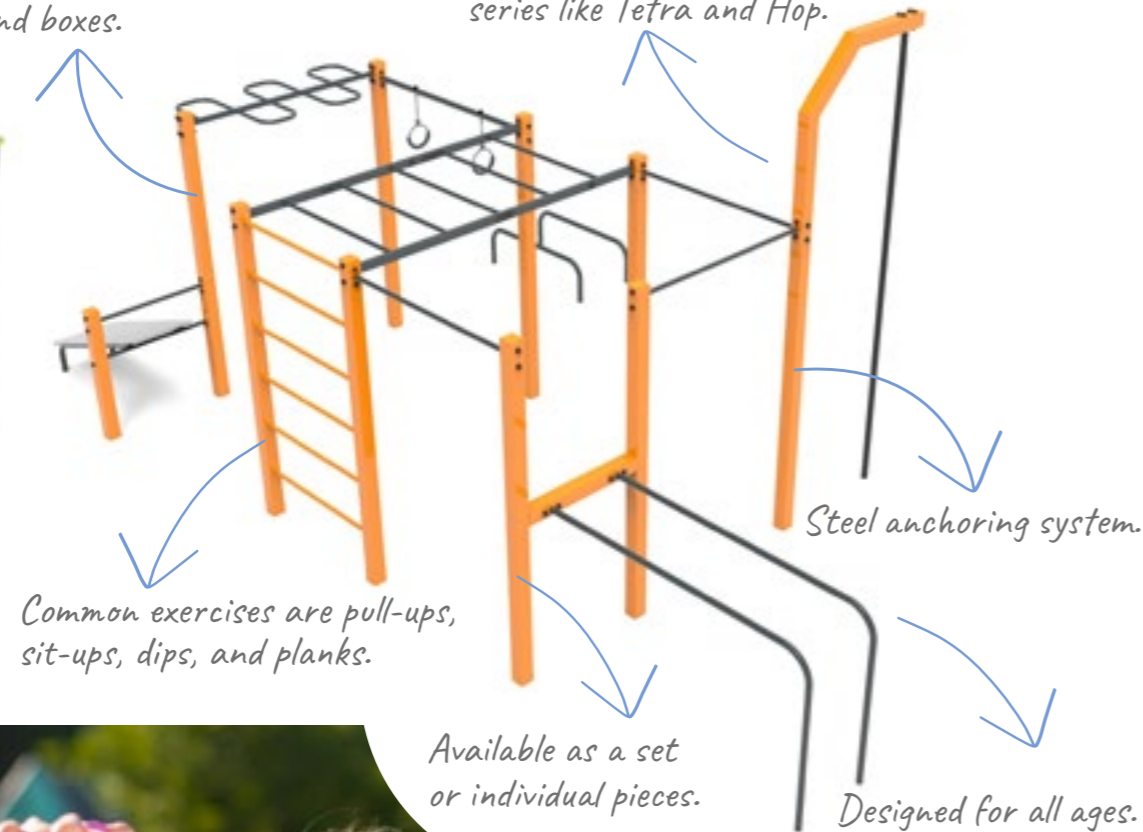

Functionalities:

-  14+ years
-  Modular playground
-  High customization capabilities

Bodyweight training equipment featuring handrails, bars, hoops, ropes, ladders, benches and boxes.

Integrates well with playground series like Tetra and Hop.

Sport Arenas

Characteristic:

The possibilities are endless! We can create a fenced-in sports field with any dimensions, terrain conditions, and court markings of your choice. Choose from football, handball, tennis, basketball or a multi-purpose field that can be used for more than one sport. Contact us to discuss your requirements.

Functionalities:

-  14+ years age
-  Modular playground
-  High customization capabilities

Fenced up to 4 metres high with different options for entry.

Steel anchoring system with deep foundations for high structural stability.

Sports and playing fields and courts.

Length, height, and width are completely customisable.

Shape can be rectangular, circular, or elliptical.

Can be equipped with lighting, goals, basketball hoops, and benches.

Easy installation.

Made from hot-dip galvanised black steel.

Choose markings for different games.

Product parameters:

Product name	Product number	Product size	Zone dimension	Max. fall height	Safety zone	Age range	Number of users	Low fall height	♿
U-shaped bike stand - module	0013007	0,44 x 0,06 x 0,8 m	-	-	-	-	-	-	-
U-shaped bike stand - example 4 modules	0013008	1,83 x 0,44 x 0,8 m	-	-	-	-	-	-	-
Street bike rack	0013004	2,00 x 0,42 x 0,30 m	-	-	-	-	-	-	-
Urban bike rack	0013006	2,35 x 0,48 x 0,35 m	-	-	-	-	-	-	-
Small steel plate	0015001	0,47 x 0,04 x 1,90 m	-	-	-	-	-	-	-
Large steel plate	0015002	0,93 x 0,08 x 1,90 m	-	-	-	-	-	-	-
Large wooden sign	0015004	0,80 x 0,22 x 1,90 m	-	-	-	-	-	-	-

Characteristic:

A perfect blend of stylish design and practical functionality! Babies are changed on a comfortable and hygienic wooden changing table, and carers are accommodated with hooks to hang up the changing bag or a shelf where it can be easily accessed. Transparent panels let in light and also allow uninterrupted monitoring of the children in surrounding areas. Customisable to match your project with different materials, colours, and UV printing.

Baby changing station.

Protects from the wind and sun.

Wooden changing table and seat with options for side panels and roof to be made from wood, HPL or UV-printed polycarbonate.

Clear rear walls provide natural light and as well as uninterrupted monitoring of the surrounding area.

Opaque front walls protect privacy.

Available in multiple colour options.

First on the market that successfully combines design with functionality.

Equipped with a shelf and hanger.

Characteristic:

Beautiful and colourful modernist-themed architectural features and arbours. With a unique blend of design and nature, this modular series can create a quiet zone, toddler area, or a dynamic outdoor classroom that is inviting and accessible to all. Select one of our designs or craft your perfect space from scratch with customisable colours, dimensions, UV-printed panels, and urban furniture.

Made from laminated timber reinforced with galvanised and powder-coated steel.

Side panels are transparent or semi-transparent polycarbonate.

Beautiful, colourful modernist-themed structures and arbours.

Wheelchair accessible.

Dream 1 gazebo
Code: 0360004

Dream 2 gazebo
Code: 0360005

Dream portal with pergola
Code: 0360001

Dream pergola over bench
Code: 0360002

Adaptable to meet different needs such as a quiet zone, toddler area, or outdoor classroom.

Modular design provides exceptional flexibility and customization.

Options for UV printing designs.

Dream pergola over bench	0360002	2,07 x 0,78 x 2,05 m	-	-	-	-	-	-	-

Characteristic:

With the health and happiness of our pets in mind, we present an innovative dog playground. This place will be ideal for dogs of all breeds and sizes, where they can play, run, and socialize with other four-legged friends. Our goal is to create a safe and friendly place that will allow dogs to enjoy spending time outdoors and strengthen the bond between dogs and their owners.
